Monitors....(2)	29 inch

CYBER FURY!

You don't need food and you don't need water. Your hunger is for destruction and your thirst is for victory. You don't feel remorse. You're a massive robot, with the sole mission of pounding the living daylights out of anything that crosses you. You don't stop. Just keep smashing and stomping inhuman vengeance.

VIRTUAL ON features Polygon modeling 3-D CG graphics that pull you into the incredible world of ruthless robots.

Grab both levers, and virtually become the metal beast of terror.

Rip your way through awesome gameplay that features amazingly realistic movements and riotous action.

There's eight robots to choose from, each have their own unique method of crushing enemies!

VIRTUAROID characters were designed by Mr. Hajime Katori, one of the world's top mechanic animation designers!

Robotic movements are controlled by two levers that each have two buttons... Use the right-hand side lever to move right and left lever to move left. Jumping is possible by "opening" Levers L and R simultaneously. Use the forefinger-operated trigger to shoot the weapon. Use the thumb-operated trigger for speed bursts.
